

Picture previously unimagined image quality.

Envision groundbreaking reliability.

Realize a new era in digital mammography.

Every so often, technology does something wonderful for patient care.

Come to BayView Radiology, where 'every so often' happens to be *right now!*

At BayView Radiology, our goal is to provide optimum care for all your patients. And that's precisely why we've selected Aspire HD for our mammography studies. Aspire HD is a full field digital mammography system from Fujifilm that provides the kind of exceptional image quality you simply won't find with any other system.

What's more, it achieves that quality with lower doses, which we know is something that everyone thinks about.

Not only that, but the system's ease of use and consistent reliability enable us to give patient care an entirely new meaning.

So go ahead and introduce your mammography patients to something wonderful. Introduce them to the very best in breast imaging: Aspire HD Digital Mammography, at BayView Radiology.

Please contact us to schedule all your patient mammograms.
